

20 Years on the Market

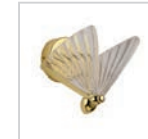

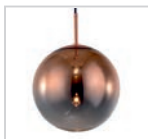

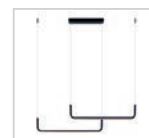

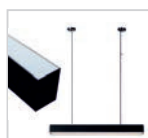

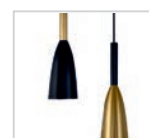

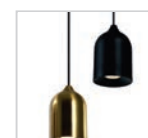

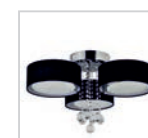

Light Prestige is not just a lamp manufacturer
– it is, above all, a creator of atmosphere.

We know that lighting is more than just an aesthetic detail.
It is the key to setting the mood, highlighting the beauty of an interior,
and creating a space you truly want to spend time in.

Our passion for light drives us every day, inspiring us to create
exceptional lighting solutions. By discovering the world of Light Prestige,
you allow light to become the very essence of your interior.

Design the Light You Live In

MAGNETIC SLIM

**It is an advanced track lighting system,
combining functionality with minimalist design.**

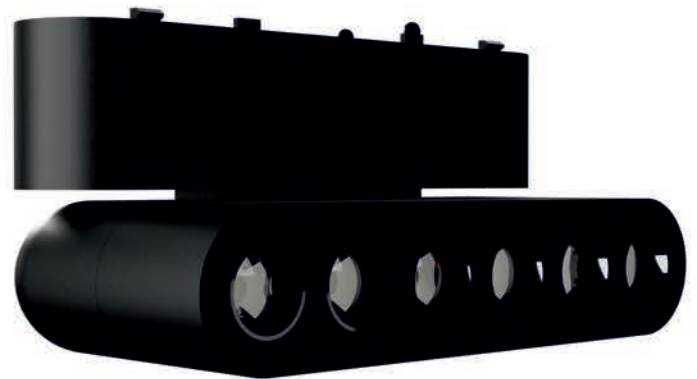

It allows for the creation of customized lighting layouts, tailored to homes, offices, and commercial spaces. The collection offers comprehensive solutions for both surface-mounted and recessed installation, ensuring design flexibility and the highest quality of workmanship.

Perfect for every space:

- **Offices:** The Magnetic Slim system is perfect for office spaces, serving as modern and flexible lighting mounted on the ceiling or wall. Thanks to the ability to easily change the configuration of the fixtures, it allows the lighting to be adapted to the changing needs of users.
- **Public spaces:** In corridors, waiting areas, or conference rooms, Magnetic Slim provides both functional lighting and an elegant, minimalist look. The system can be easily expanded and configured according to the requirements of the space.
- **Residential interiors:** This system is also perfectly suited for home arrangements – in living rooms, kitchens, or bedrooms. Magnetic Slim serves not only a practical function but also a decorative one, bringing a modern character to the interior.

Magnetic Slim is more than just lighting – it is a modular space for your creativity. Design, adapt, and create lighting compositions tailored to any space.

**Discover what makes
MAGNETIC SLIM
unique**

INNOVATIVE MAGNETIC SYSTEM

Magnetic Slim is a track lighting system that uses magnetic technology for mounting LED spotlights. The fixtures attach to the tracks with magnets, allowing them to be moved and rearranged at any time, while ensuring exceptionally easy and quick installation.

COMPACT TRACK DIMENSIONS

Magnetic Slim tracks stand out for their compact size, measuring only 6 mm in height and 26 mm in width. This design allows the lighting system to be subtly integrated into the space without overpowering the interior arrangement. The slim profile of the tracks makes them an ideal choice for modern and minimalist interiors, where aesthetics and functionality go hand in hand.

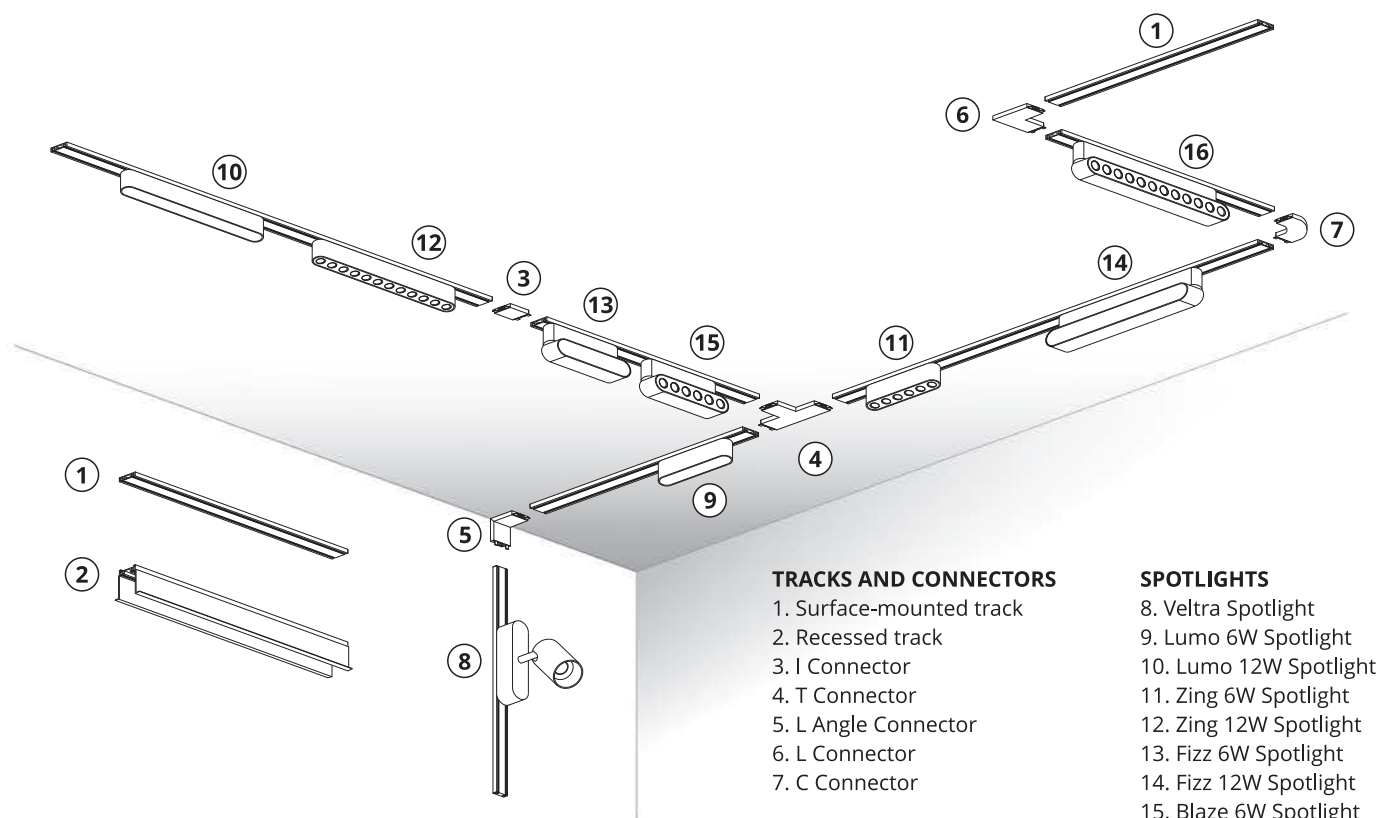

SINGLE-PHASE SYSTEM

The single-phase system allows simultaneous control of all spotlights connected to the same track circuit. This solution is ideal for spaces where simple and efficient lighting management is required.

VARIETY OF CONNECTORS

The Magnetic Slim system is designed for maximum flexibility in lighting layout design. Thanks to a range of connectors, it is possible to create unique lighting compositions perfectly tailored to the characteristics of the interior.

COMPONENTS OF THE MAGNETIC SLIM

The Magnetic Slim system includes:

Magnetic tracks:

- 200 cm in length, available in two colors (white and matte black), with surface-mounted and recessed options

Magnetic LED spotlights:

- Available in 3000K (warm light) and 4000K (neutral light), in white or black

Connectors in various shapes:

- Allowing the creation of simple and complex lighting layouts, as shown in the diagram

End caps:

- Perfect for a clean and aesthetic finish of any installation

Power supplies:

- 100W and 200W

GEOMETRIC SYSTEM IP54 Accessories

Endless creative possibilities:

- With the Geometric System, you can connect elements at 120° (hexagon) or 90° (square/rectangle) angles, giving you the freedom to design perfectly geometric patterns or organic, free-flowing compositions.
- Want to hang your lighting? Adjustable hanging cables let you craft stunning suspended arrangements, adding depth and style to any space.
- Plus, with a wide variety of connectors, the possibilities are truly limitless - combine elements however you like and bring your vision to life!

Modular Lighting Without Limits

Discover a revolutionary modular lighting system that gives you endless possibilities. Design your own unique patterns and customize them to perfectly suit your space.

Perfect For Every Space:

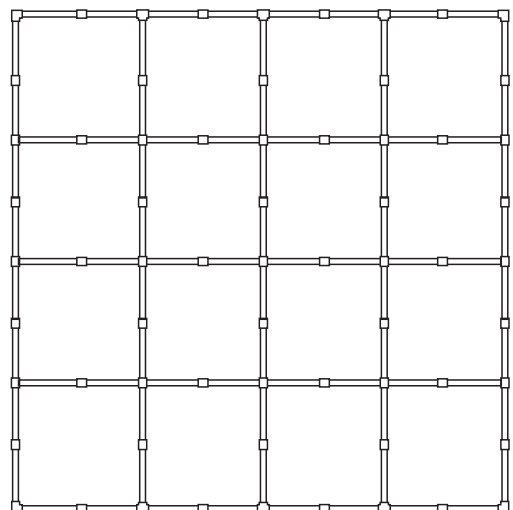

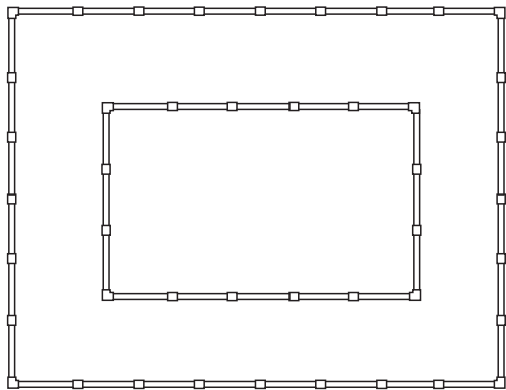

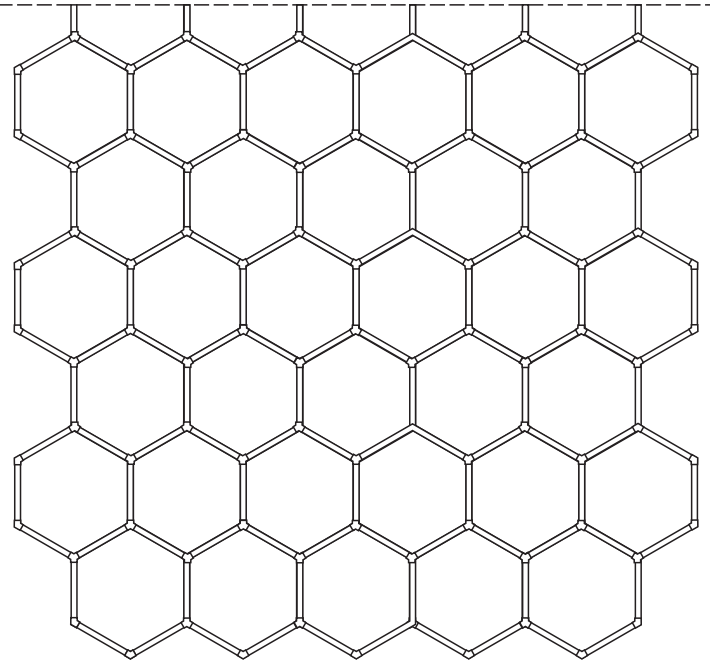

- **Offices:** Transform your workspace with stylish ceiling lighting that enhances both function and aesthetics.
- **Public Areas:** Ideal for waiting rooms, corridors, or conference rooms, combining practical illumination with eye-catching design.
- **Garages:** Adaptable modules let you light every corner efficiently while maintaining a clean, modern look.
- **Home Interiors:** Elevate your living spaces with lighting that's both decorative and functional.

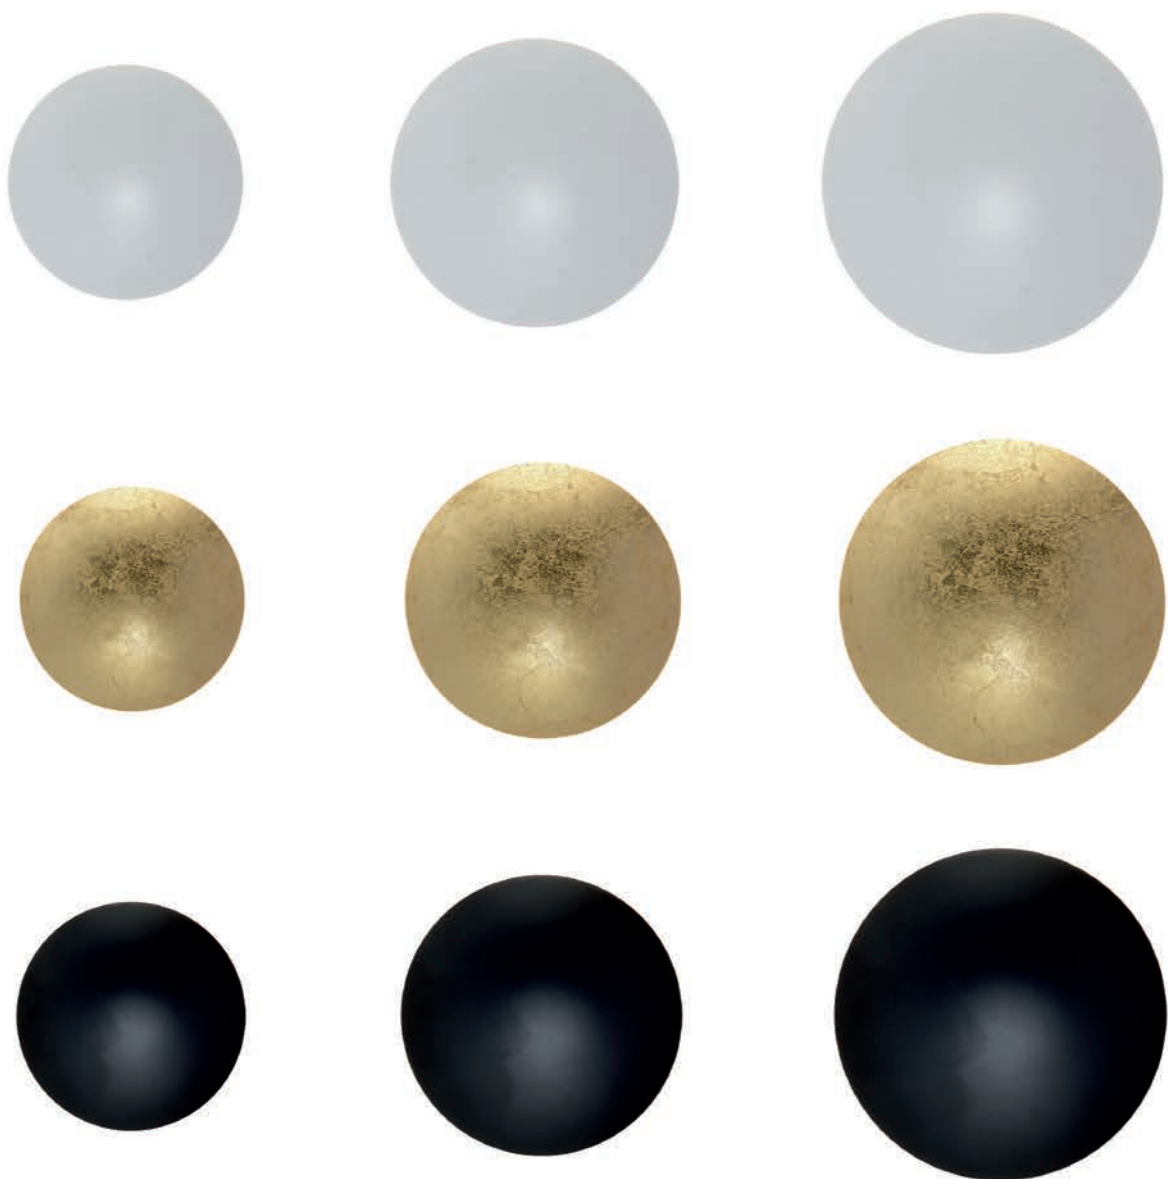

The Geometric System isn't just a lamp - it's a canvas for your creativity. Let your imagination shine and craft one-of-a-kind lighting compositions!

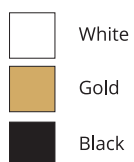

Easily expand the system and design
limitless configurations

DISCOVER THE DETAILS

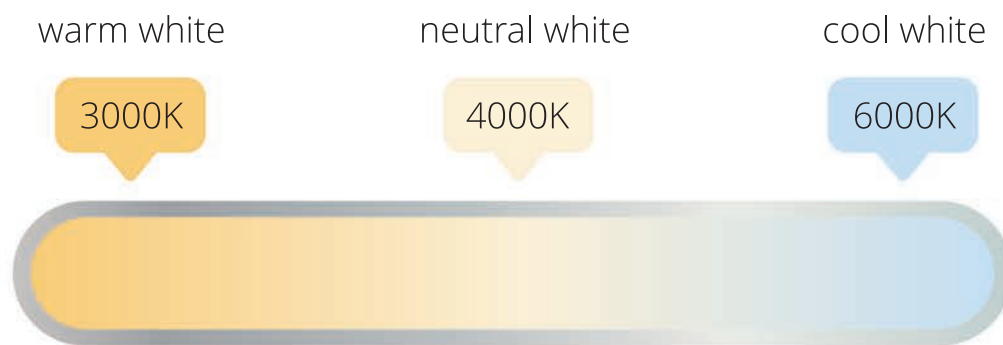

Light Color

Light color describes how we perceive the light emitted by a lamp – warm, neutral, or cool. It is measured in Kelvins (K):

2700–3000K – Warm White (cozy, home-like atmosphere)

3500–4100K – Neutral White (offices, kitchens, bathrooms)

5000–6500K – Cool White (workspaces, warehouses, areas requiring good visibility)

Variable Light Color (CCT) – Set During Installation

The **Correlated Color Temperature (CCT)** feature allows you to adjust the light color to suit your individual preferences. Lamps equipped with **CCT** enable smooth adjustment of the color temperature from warm, through natural, to cool light. This innovative function not only illuminates your space but also lets you create the desired atmosphere for different moods or tasks. **The light color is set before installation**, providing a perfect foundation for your lighting design.

Variable Light Color (CCT) – Remote Control

The **CCT** feature allows you to adjust the light color from warm, through natural, to cool, giving you full control over the lighting atmosphere. Lamps marked with this feature can **change color smoothly using the included remote control**. This function makes it easy to adapt your lighting to different moods, activities, or settings at any time, providing both convenience and flexibility.

Variable Light Color (CCT) – Tuya App Control

The **CCT** function lets you personalize the light color from warm, through natural, to cool, enhancing the atmosphere in any room. With **Tuya Smart app** connectivity, you can adjust brightness and color temperature directly from your smartphone. This feature brings maximum convenience and flexibility, allowing you to create the perfect lighting for any moment with ease. **The Tuya app** is available for free on the App Store and Google Play.

IP Rating (Ingress Protection)

The IP rating indicates the level of protection a lamp has against dust and water. It consists of two digits:

IP20 – protected against solid objects >12 mm (e.g., fingers), no water protection; typical for dry indoor spaces like living rooms or bedrooms.

IP40 – protected against solid objects >1 mm, no water protection; suitable for interiors where dust may be present.

IP44 – protected against solid objects >1 mm and splashing water; suitable for bathrooms or covered outdoor areas.

IP54 – dust-protected and resistant to light water jets; good for kitchens, bathrooms, or covered terraces.

IP65 – completely dust-tight and resistant to strong water jets; ideal for gardens, building facades, and other outdoor areas.
